AMEY RAVINDRA PANDIT

Data Analyst | SQL | Python | Power BI | Excel | Ratnagiri, Maharashtra

github.com/AmeyPandit36 | linkedin.com/in/ameyrpandit | ameypandit36@gmail.com | +91-8600309618

Professional Summary

Final-year Information Technology student with hands-on experience in Python, SQL, data cleaning, exploratory analysis, and dashboard development. Builds interactive analytics applications and data-processing workflows using Python, Power BI, and Streamlit, emphasizing data quality, analytical interpretation, and actionable insights.

Education

Finolex Academy of Management and Technology, University of Mumbai — Expected Jun 2027
B.E. Information Technology (DBMS, SQL, Statistics, Data Analytics, Machine Learning) — CGPA: 7.5

Experience

The Developers Arena — Jun 2026 – Present
Data Science Intern — Remote

- Perform data extraction, cleaning, and exploratory analysis in Python to identify trends and patterns across project datasets.
- Apply structured data-processing and analytical techniques to practical problems and interpret findings.

Lenovo LEAP — May 2026 – Jun 2026
GenAI & Agentic AI Intern — Remote

- Developed an AI-driven business intelligence solution to automate data analysis and reporting workflows.
- Built data-processing pipelines using Python, PostgreSQL, Pandas, n8n, and LLMs for extraction, cleaning, validation, exploratory analysis, and insight generation.

Projects

MatRisk AI – Scientific & Financial Intelligence Platform — GitHub | Live Demo
Python, Pandas, NumPy, Streamlit, Plotly, Machine Learning

- Developed a seven-page analytics platform integrating six datasets across materials science, commodity markets, infrastructure risk, elemental pricing, and sustainability.
- Built interactive dashboards for material properties, commodity trends, infrastructure-condition analysis, ESG indicators, model experiments, and data-quality monitoring.
- Evaluated analytical and modelling workflows while documenting data limitations and model-validation constraints.

Auto Loan ABS Credit Risk & Analytics Dashboard
Power BI, DAX, Power Query

- Built an interactive dashboard for a INR 54.6 Cr auto-loan portfolio (500 loans), analyzing INR 31.8 Cr outstanding exposure across 19 states and 3 servicers.
- Developed an IFRS 9 Expected Credit Loss model using PD, LGD, and EAD across Stage 1, 2, and 3 exposures.
- Performed cohort and vintage analysis (15 cohorts, 375 vintage-month records) and built a delinquency transition matrix from 6,000 DPD snapshots to surface early-warning risk indicators.

FloatChat: AI-Powered Oceanographic Data Analytics
Python, FastAPI, PostgreSQL/PostGIS, Pandas, Xarray

- Built Python scripts to extract and process NOAA OISST and ARGO datasets, applying quality-control flags to filter faulty sensor readings.
- Designed a natural-language-to-SQL pipeline over a PostGIS database, with 38 unit tests passing.
- Planned Isolation Forest anomaly detection for sea-surface-temperature trends along the Konkan coast.

AI-Driven Automated Business Intelligence Platform
Python, PostgreSQL, Pandas, n8n

- Automated data extraction, cleaning, validation, exploratory analysis, and AI-assisted business-insight generation and reporting.

Technical Skills

Languages & Databases: Python, SQL, PostgreSQL, MySQL
BI & Visualization: Power BI (DAX, Power Query), Excel, Plotly, Matplotlib, Streamlit
Tools: Jupyter, Google Colab, Git, GitHub, n8n
Analysis: Pandas, NumPy, EDA, Data Cleaning, KPI Analysis
Excel: Pivot Tables, XLOOKUP, SUMIFS
AI: Generative AI, LLMs, Agentic AI

Certifications

SQL Associate – DataCamp — Sep 2026
Associate Data Analyst – DataCamp — Aug 2026
Data Analysis using Python – IBM / Cisco
